

Brief Company Overview

For over 30 years, Equitrac has delivered the industry's most innovative print and cost management solutions. Serving the print cost management, cost recovery, office productivity, document security and environmental conscience of leading professional services organizations, academic institutions and corporate enterprises, Equitrac's award-winning solutions offer scalable software solutions to authorize, authenticate and account for use of multifunction peripherals (MFPs), copiers, faxes and scanners from the world's leading manufacturers.

Equitrac has a global network of over 25,000 customers and boasts the largest team of print and cost management experts in the world. Equitrac's Research and Development facility, located in Waterloo, Ontario, Canada is an engineering hub with a long history of delivering innovation to the industries in which Equitrac solutions are managing print costs and supporting corporate environmental initiatives.

Equitrac's partner network is comprised of major OEMs and technology partners including Canon, Fuji Xerox, HP, Konica Minolta, Kyocera, Oce, Ricoh, Samsung, Sharp, Toshiba and Xerox, to ensure that its device-embedded and terminal-based software solutions are compatible with all office equipment within the network print environment.

Founded in 1977, Equitrac is a privately-held company based in Plantation, Florida.

Equitrac has a global network of over 25,000 customers with the largest team of print management and cost recovery experts in the world.
